Profile Summary

Computer Science graduate with First Class Honours, skilled in data analytics, machine learning, and full-stack web development. Experienced in delivering practical solutions through projects and internship work, including dashboards, automation tools, and AI applications. Recognized for analytical thinking, problem-solving, collaboration, adaptability, and organized execution. Highly motivated to learn continuously, contribute meaningfully, and translate technology into tangible outcomes. Combines intellectual curiosity, disciplined work ethic, and a results-oriented mindset, prepared to tackle challenging projects and grow professionally.

EDUCATION

JOMO KENYATTA UNIVERSITY OF AGRICULTURE & TECHNOLOGY (2021 – 2025)

BSc Computer Science — First Class Honours

Kenya High School (2017 – 2021)

KCSE - Mean grade (A-)

CERTIFICATIONS

- Machine Learning (Intro & Intermediate) — Kaggle
- Supervised Machine Learning: Regression & Classification — DeepLearning.AI
- Get Connected — Cisco Networking Academy
- Dynamics 365 Business Central Developer Associate - Learnovate

TECHNICAL & ANALYTICAL SKILLS

Programming: Python, C++, AL, JavaScript, SQL, HTML5, CSS
Libraries & Frameworks: NumPy, Pandas, Scikit-learn, Django
Tools: Microsoft Dynamics 365, Power BI, Cisco Packet Tracer, VMware, vSphere, Sophos XG Firewall, Git, SharePoint, XAMPP

EXPERIENCE

BUSINESS & INFO - SYSTEMS INTERN KENYA ROADS BOARD
May 2024 – Aug 2024

- Developed Power BI dashboards providing actionable insights for decision-making
- Supported server and network infrastructure within VMware and firewall environments
- Designed SharePoint onboarding portal improving integration for staff and interns
- Assisted migration of corporate website to a new server environment
- Conducted local testing using XAMPP and supported WordPress updates
- Built a Python automation script to organize and extract data from high-volume email inboxes

PROJECTS

SMART POTATO FARMING — MACHINE LEARNING SYSTEM

- Developed computer vision model to detect potato late blight disease
- Implemented MobileNet and Xception image classification models
- Built ML pipeline using Python and TensorFlow, optimized for real-time predictions
- Applied AI to solve practical agricultural challenges

MY CAMPUS — WEB PLATFORM

- Built full-stack campus platform for clubs, sports, and events
- Backend using Django, frontend using HTML, CSS, JavaScript
- Designed database structures for efficient content management
- Collaborated to improve UI/UX and deployment processes

REFEREES

Mr. Mandela Ngatia
Senior ICT Officer, Kenya Roads Board
